To Whom It May Concern:

Enclosed please find the hard copies and electronic copies of the Sensitive Population and Resource Checklist for the site located at 202 Route 46 West, Mt. Olive, New Jersey. Three sensitive populations were identified within 200-feet of the site. Specifically, the sensitive populations identified included residences, a small stream known as Black Brook Stream, a potable well, and a Non-Community Tier 1 well-head protection area. Please see the attached copy of the NJDEP iMap, boundary map, census information, school directory information and licensed child care information for reference.
