P.O. Box 370
Mendham, NJ 07960-

Re: **Morris County MUA** PWSID No. NJ1432001
Permit Application No. WCP080002

Dear Mr. Scarmoza:

Following a phone conversation on October 30th 2008 with Mauro M Bacolo PE of your Engineers, Crew Engineering, regarding Administrative Deficiencies with your application dated March 28th, 2008, and received October 22nd 2008 for a Distribution System Permit to construct, modify and operate Public Water Works has been reviewed and determined to be **ADMINISTRATIVELY COMPLETE**. This application proposes installation of two new 2000 GPM Booster Pump at Flanders Valley Wells Nos. 1 & 2 and a new 300 HP motor at Well No. 2., located within Block No. 101, Lot No. 2 in Roxbury Township and Block 5900, Lot 2 in Mt Olive Township, Morris County, New Jersey.

I apologize for the errors that have occurred during the Administrative Review and my investigation and review has found that:

Upon receipt by the Bureau of Water Systems and Well Permitting the application had inappropriately been separated out from its binder and therefore the relationship between signatures / seal and specification was lost. The specifications originally being bound with the signed and sealed contract are acceptable.

It appears that the USGS quarter quad location maps were lost with the break up of the application; however replacement copies have been received on November 3rd 2008 and this item is acceptable.

The reference to the Chemical Feed Technical Review form PA-12 and request for plans to determine chlorine contact time, should have included mention that these are not specifically Administrative Deficiencies but documents that the Technical Reviewer will require to commence their review because the flow rate through the plant has increased.

Accordingly, your application has been assigned for technical review to Wade Wertman. Please note that during technical review, the assigned reviewer may request additional information.

Please note that the Standard Application Form has been revised and shall be used for all future applications.

The Department maintains various web reports that can assist you in reviewing the progress of your permit application and these are available at: http://datamine2.state.nj.us/dep/DEP_OPRA/index2.html and click on Pending Permits Progress Reports.

Once again I apologize for the errors during the Administrative Review and procedures have been revised so that applications remain in the binders that they are submitted in.

Should you have any questions regarding the technical review, please contact Wade Wertman at (609) 984-6831 or by e-mail at Wade.Wertman@dep.state.nj.us. When contacting the Department regarding this application always reference both the PWSID No. NJ1432001 and assigned Permit Application No. WCP080002.

Sincerely,

Steven Pudney
Supervising Environmental Engineer
Bureau of Water Systems and Well Permitting
