RE: Feral Cat Trap/ Neuter/ Release Program

Dear Mount Olive Health Dept and Members of the Town Council:

The doctors of Flanders Veterinary Clinic are all in agreement that a "Capture/ Spay/Neuter/ Release" Program would be a beneficial option for the control of the population of feral cats in the township. It is unfortunate that the licensing fees obtained from cat lovers in Mount Olive are presently being used to capture, house, destroy and dispose of the feline cat colonies.

We would also like to inform the township that we are willing to assist, as necessary, with the local Capture/ Neuter/ Release organization to provide the much needed low cost spaying and neutering of these felines. Please keep us informed as to the outcome of your decision. We are confident that the Town Council will do whatever is mutually beneficial for the feral cat population as well the community.

Sincerely,

Nicholas L. Minervini, DVM
