Re: Susquehanna-Roseland Electric Transmission Line Public Hearings

As you may know, PSEG is seeking approvals to upgrade the Susquehanna-Roseland electric transmission line. This upgrade has been requested by PJM, the experts who manage the grid, in order to avoid future brownouts and blackouts. This upgrade will provide significant construction jobs at a time when they are desperately needed as well as insure the continued reliability of electric service to the region.

There are three public hearings remaining, and because of organized opposition from local residents it is imperative that representatives of the business and labor communities attend and speak out in favor of this project.

The remaining public hearings are as follows:

**June 18 ( TONIGHT)** 7PM at Sussex County Community College theater, One College Hill Rd. Newton, NJ

**June 25** at 1pm at Highlands Council Headquarters, 100 North Road, Chester, NJ

**June 30** at 7pm at Morris County Frelinghuysen Arboretum, 53 East Hanover Ave, Morristown, NJ

**Please make an effort to attend and speak out in support of this critical infrastructure project .**

Email letters of support can also be submitted to the following three regulatory agencies.
