Subject: Thank Senator Menendez for his support in the health care debate

Dear Mayor or Councilmember,

As you know, the Senate Finance Committee is considering legislation to reform the health care system in our country. These significant decisions will impact the future of the biopharmaceutical industry and our continued efforts to improve the health and livelihood of patients nationwide and here in New Jersey.

Throughout this process, Senator Menendez has worked tirelessly to promote medical innovation in the United States and protect biopharmaceutical jobs here in New Jersey. He supports policies that ensure our ability to continue researching and developing breakthrough medicines and do not eliminate jobs in our state or jeopardize scientific discovery.

He understands that if done wrong, the changes to our health care system could be devastating to our companies and employees that our communities call home. These employees are the backbone of our local economies; paying property taxes where they live, purchasing groceries and goods at local merchants and volunteering their time to help make our communities better.

We encourage you to contact Senator Menendez to thank him for his leadership by e-mailing him through the We Work for Health Web site at www.WeWorkforHealth.org/nj-menendez-action, or by calling the We Work for Health hotline at 877-857-9638 to be connected to his office.

Thank you for your continued commitment to the biopharmaceutical sector and your participation in this important effort.
